

Agreement for participation in the pilot test program

Aerodelis plans to build first 30-35 models for tests pilots only, during May - mid August 2018 period of time. The test pilot can get only maximum 3 models.

A test pilots has to assemble and start flying the model not later than 3 weeks after the shipping.

The Test pilot is required to provide the following feedback to the aerodelis:

- about assembling the plane, how it went, problems, difficulties and possible improvements and solutions.
- flying: how it flies, observations in the different weather conditions, what settings, CG, ballast and what joiners were used, etc

Aerodelis will setup a private discussion group to share the feedback and experience. All feedbacks and communication between pilots and the company stay a confidential and cannot be published without Aerodelis approval.

Aerodelis holds the rights for this data and can publish that only with a pilot's compliance.

All test models will have Aerodelis logo or/and company name/shop name for advertising purposes.

All test models are not a subject of commercial trading: The test pilot has to met and follow all conditions mentioned in this agreement, before the model could be traded or sold on third parties. So test models are not for a reselling purposes.

Any sells or dealers relations are not covered in this agreement and should be discussed separately.

What the test pilot gets as a bonus:

- The pilot will be served ahead of waiting list, getting spare parts or repairs
- Get shared information from company and others test pilots
- Discount for buying maximum 4 models until end of 2018.
- Discount for spare parts.
